# Sai Smruti Ranjan Das

7987237184 | saismrutiranjan1810@gmail.com | linkedin.com/in/saismrutiranjan/ | github.com/saismrutiranjan18

## TECHNICAL SKILLS

**Languages**: Java, JavaScript, HTML/CSS
**Frameworks**: React, Node.js, Express, Tailwind CSS, Material-UI, Bootstrap
**Developer Tools**: Git/GitHub, MongoDB, VS Code, Visual Studio

## EDUCATION

**Medi-caps University**                                          Aug. 2023 – May 2027
*Bachelor of Technology in Computer Science*                          *CGPA: 7.9/10*

**Shiva Academy English Medium Hr. Sec. School**                 Aug. 2021 – May 2023
*Pre-University - Physics, Chemistry, Math*                       *Percentage: 88.6%*

## EXPERIENCE

**GirlScript Foundation - GirlScript Summer of Code**           Oct. 2024 – Nov. 2024
*Contributor*                                                            *Remote*

- Actively contributed to open-source projects through the GirlScript Summer of Code (GSSoC).
- Identified and resolved various issues within project repositories.
- Submitted multiple pull requests to implement bug fixes and enhancements, collaborating with project maintainers and other contributors.

## PROJECTS

**WanderLust** | *Node.js, Express.js, MongoDB, Mapbox API, EJS*          **September 2024**

- Utilized Node.js for backend logic and MongoDB for scalable data management.
- Developed a dynamic travel platform with EJS for server-side rendering and Express.js for RESTful API routing.
- Integrated Mapbox API for interactive maps with custom markers.

**Tiffin Fusion** | *HTML, CSS, JavaScript, Bootstrap, Node.js, MongoDB*        **October 2024**

- Developed a responsive website to connect tiffin centers with students and working professionals, offering meal plans.
- Designed an intuitive user interface using Bootstrap for a clean, modern, and mobile-friendly experience.
- Implemented dynamic functionalities using JavaScript, enhancing user interaction and experience.

**Weather App** | *React.js, OpenWeather API, JavaScript*                     **October 2024**

- Developed a weather application using React.js to display real-time weather information for any location.
- Integrated the OpenWeather API to fetch live weather data, including temperature, humidity, and weather conditions.
- Designed a responsive user interface with CSS, ensuring compatibility across various devices.

## ACHIEVEMENTS

**GirlScript Summer of Code (GSSoC) 2024 Extended**                         Nov. 2024
Ranked **307th** among thousands of open-source contributors.

## CERTIFICATIONS

**MongoDB Developer's Toolkit**                                            Nov. 2024
GeeksforGeeks

**Full Stack Web Development**                                             Sept. 2024
Apna College

**Postman API Fundamental Student Expert**                                 Oct. 2024
Postman
